## Hansecom Italia: customized solutions for industry

**Hansecom Italia S.r.l. Unipersonale** was founded in 1994 by two Hanseatic traders and in 2012 it became a sole proprietorship under the management of Mr. Sven Kühnhold.

Located in Capriolo in the province of Brescia, it is specialized in the supply of a wide range of items such as technical gaskets, elastomer parts and complementary products for industrial applications. With over 30 years of experience, we offer customized solutions in a wide range of materials, including **NBR, FPM, EPDM, VMQ, FVMQ, HNBR, NR, CR, PTFE and PCTFE**, as well as other high-performance polymers, ensuring quality, reliability and constant technical support.

We collaborate with customers in several applications, **from drinking water to food, from chemical to petrochemical, from automotive to nuclear, etc.**, offering certified components and timely supplies, in line with the most complex production needs.

Our continuously growing company **operates on a surface area of over 3.000 m<sup>2</sup>** and it relies on the collaboration of qualified personnel, trained to provide a unique and individual service in order to solve any specific problem. As a consequence of its corporate philosophy, Hansecom Italia S.r.l. Unipersonale was certified in 2002 according to the **UNI EN ISO 9001:2000** standards, obtained the **UNI EN ISO 9001:2015** certification in 2017 and the **UNI EN ISO 14001:2015** certification in 2024.

Furthermore, it has decided to introduce a health and safety management system at work in reference to the **UNI EN ISO 45001:2023** standard, extended to the entire business activity.

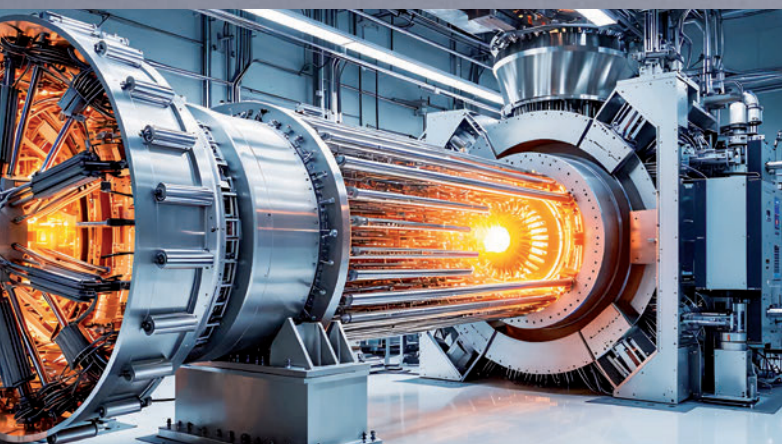

## Application fields

Thanks to the versatility of the materials used and the high-quality processes, **Hansecor Italia S.r.l. Unipersonale** supplies technical components and certified gaskets for a wide range of industrial sectors.

Our solutions are used in highly regulated and technologically advanced fields, such as **drinking water, food industry, chemical and petrochemical sector, automotive, gas industry and hydraulics**.

We also collaborate with companies operating in the **nuclear sector**, where extremely high standards in terms of safety, resistance and reliability are required.

Our experience allows us to fulfil to the specific needs of any sector, offering customized solutions, approved materials and specialised technical support.

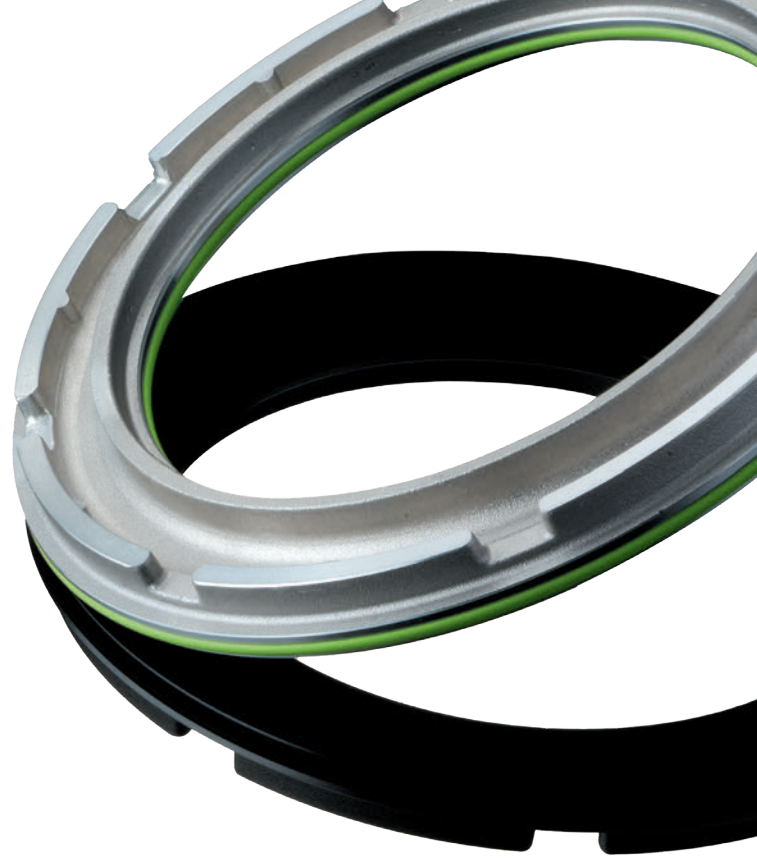

# Gaskets for automotive sector

Rubber parts and elastomeric materials designed for critical applications in the automotive sector.

We guarantee high performances in terms of sealing, resistance to temperatures and chemical agents, with specific solutions for mechanical and electrical systems.

- O-Ring for airsprings
- gaskets for waterpumps
- oil pan seals
- valve cover gaskets
- O-Ring for automatic gear boxes
- grommets

O-Ring for automatic gearbox

Valve cover gasket

Grommet

O-Rings for airspring

Valve cover gasket

Gasket for waterpump

Oil pan seal

Valve cover gasket

## O-RINGS

O-Rings in various diameters from the smallest dimensions up to 8 metres, cords and elastomers. Materials approved according to: EN549 - EN681 EN682 - FDA - KTW-BWGL - WRAS - NSF-61 - UL157 DIN EN 16421

Surface treatments

- siliconized
- with talcum powder
- PTFE finishing
- plasmacoated

---

## TTV O-RINGS

TTV O-rings offer excellent performances in industrial applications, thanks to high-performance materials resistant to temperatures, pressures and chemical agents. Suitable for many sectors, such as automotive, chemical and food industry, they ensure good sealing and long-lasting quality, thanks to rigorous quality controls.

## Gaskets for fittings

PTFE-sealing tape for metal or plastic threads, fitting and flanges. Approved for gas according to DIN EN 751-3, FDA compliant.

## Gaskets for bottling systems

- gaskets according to customers drawing for bottling plants in the beverage industry such as deflectors and tap washers, etc.
- food pumps

## Industry: a wide selection of different items

Parts according to customer drawing in various elastomers such as lip seals, washers, water-cut products and custom gaskets for technical applications.

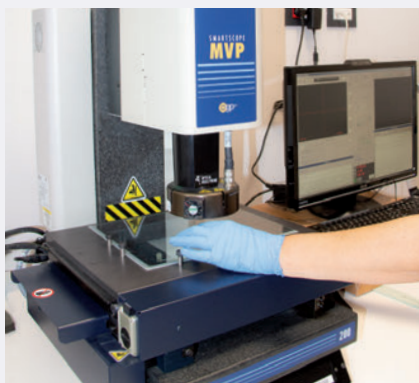

## Quality control and technical support: end-to-end service

**Hansecom Italia**, thanks to more than thirty years of experience, is able to offer support in the design of custom gaskets and assistance in the choice of material and type of gasket.

UTP Kalix for measuring diameters and linear size bands

TGA thermogravimetric material analysis

OGP projector, 3D measurement and surface inspection

UTP MiniMatlix Automatic sorting machine

Our laboratory is equipped exclusively with modern and technological instruments. Our products are subjected to accurate and meticulous inspection in compliance with the **DIN/ISO/ASTM** requirements or according to the specifications requested by the customer.

UTP MiniMatlix Automatic sorting machine

# A state-of-the-art headquarters: innovation, efficiency and environmental sustainability

**Hansecom Italia S.r.l. Unipersonale** has been operating since 2023 in a new **3000 m<sup>2</sup>** facility on two levels, with **750 m<sup>2</sup> of offices** and **1800 m<sup>2</sup> of warehouse** space in a modern building equipped with the latest technological innovations to minimize consumption and environmental impact through various systems including: **biomass heating system, photovoltaic panels, air filtration system, rainwater recovery system with a storage capacity of 44000 l.**
